Dear Michigan Government Committee Members,

TOPIC: HB 4795 . . . No Restriction on Right to Bear Arms

My Position: Pro HB 4795 No Restriction on Right to Bear Arms

Testimony for Pro Stance:

- Restrictions are against the Constitutional Law
- Restrictions open the door for more restrictions to whittle away our rights
- Benjamin Franklin once said: "Those who would give up essential Liberty, to purchase a little temporary Safety, will receive neither Liberty nor Safety."
- Criminals don't care about laws, gun laws only restrict the innocent.
- Data shows that the more armed a societie is the less violent crime there is
- The Best Way to Protect a society is to let individuals in that society protect themselves. US citizens are not victims, we shouldn't legislate laws that treat citizens as victims or we will become victims.
- Consieled Carry is Legal in Michigan with a permit. Some citizens don't recognize how many people are regularly armed so they don't make the connection between gun ownership and security.

I feel strongly that HB 4795 (No Restriction on Right to Bear Arms) is very important for the people to maintain safety and security of our society. I acknowledge that there my be criminal acts committed with guns, but those criminal acts would be committed regardless legislation. Criminals don't care about laws or moral principles, HB 4795 should be passed to allow citizens to protect themselves.

Sincerely,

Jacob Kallie
